Coding & Solution

This section evaluates the quality and completeness of your implemented code and the overall solution. Your submission should demonstrate working functionality, clean code practices, and alignment with your defined requirements.

Instructions:

1. Ensure your code is well-structured, commented, and follows best practices for your chosen technology stack.
2. The solution should address the core problem statement and implement the key functional requirements.
3. Include all source files, configuration files, and setup instructions needed to run the application.
4. Attach or link to your code repository (e.g., GitHub) in the table below.

Solution Summary

Field	Details
Repository Link / URL	[Paste your GitHub / GitLab or hosted link here]
Programming Language(s)	[e.g., Python, JavaScript, Java]
Framework(s) Used	[e.g., Flask, React, Spring Boot]
Key Features Implemented	Credit card approval prediction, data preprocessing, machine learning, prediction output
Pending / Incomplete Features	None
Setup / Run Instructions	Install python libraries run the project open the application

No. of Functional Features Included in the Solution

Date	03/07/2026
Team ID	XXXXXX
Project Name	CREDIT CARD APPROVAL
Maximum Marks	5 Marks

Functional Features Overview:

This document lists all the functional features included in the project solution. Each feature is described with its purpose, implementation status, and contribution to the overall solution.

S.No	Feature Name	Feature Description	Module / Component	Status (Done / In Progress / Pending)	Marks Contribution
1	User login	User login	Login module	done	high
2	Data upload	Upload applicant data	Data input	done	high
3	Data processing	Clean and prepare data	Preprocessing	done	high
4	Model training	Train ML model	Machine learning	done	high
5	Credit Card prediction	Predict approval	Prediction module	done	high
6	Result Display	Display prediction result	Output module	done	medium
7	Error Handling	Hamdle invalid inputs	validation	done	medium
8	Github Respository	Project uploaded to github	repository	done	medium

Feature Summary:

Metric	Count / Value
Total Features Planned	8
Total Features Implemented	8
Core / Must-Have Features	User login,data upload,data processing,credit card prediction
Additional / Nice-to-Have Features	none
Features Tested & Verified	8

Feature Category Breakdown:

S.No	Category	Features in Category	Example Features
1	User Interface (UI)	2	Login,Result display
2	Backend / Logic	2	Prediction,Validation
3	Database / Storage	1	Applicant data storage
4	API / Integration	1	Flask api
5	Security / Authentication	2	User login, input validation
