

### Project Executable Files

|                      |                      |
|----------------------|----------------------|
| <b>Date</b>          | 04/07/2026           |
| <b>Team ID</b>       | XXXXXX               |
| <b>Project Name</b>  | CREDIT CARD APPROVAL |
| <b>Maximum Marks</b> | 3 Marks              |

### Project Executable Files

This section requires submission of all executable and deployable files for your project. Ensure all files are properly organized, named, and uploaded to the specified submission platform. The evaluator must be able to run or deploy your solution using the provided files and instructions.

#### Step 1: Submission Checklist

| S.No | Item to Submit                                                  | Submitted (Yes / No / NA)  |
|------|-----------------------------------------------------------------|----------------------------|
| 1    | Complete source code (all files and folders)                    | YES                        |
| 2    | README / Setup Guide (instructions to run the project)          | YES                        |
| 3    | requirements.txt / package.json / dependency file               | YES                        |
| 4    | Database schema / seed files (if applicable)                    | YES                        |
| 5    | Environment configuration file (.env.example or similar)        | YES                        |
| 6    | Deployed application URL (if hosted)                            | IF NOT HOSTED              |
| 7    | APK / Executable binary (if applicable for mobile/desktop apps) | FOR WEB APPLICATION        |
| 8    | Dockerfile / Containerization config (if applicable)            | NA                         |
| 9    | Test files and test results                                     | YES                        |
| 10   | Demo video or walkthrough (if required)                         | NA(OR YES IF RECORDED ONE) |

## Step 2: File / Folder Structure

Provide an overview of your project's file and folder structure below:

[Paste or describe your folder structure here. Example:]

```

/project-root
/src    - Source code files
/tests  - Test files
/docs   - Documentation
/config - Configuration files
README.md - Setup and run instructions
requirements.txt - Python dependencies (or package.json for Node)
  
```

## Step 3: Deployment / Access Details

| Field                       | Details                                                                                                                  |
|-----------------------------|--------------------------------------------------------------------------------------------------------------------------|
| Hosted / Deployed URL       | NOT HOSTED                                                                                                               |
| Login Credentials (Demo)    | <a href="mailto:Venkatarithwik_pallapolui@srmmap.edu.in">Venkatarithwik_pallapolui@srmmap.edu.in</a><br>Pas:Rithwik@1289 |
| Platform / Hosting Provider | Localhost                                                                                                                |
| Repository Link             | SUBMITTED AS ZIP FILE WITH PROJECT SOURCE CODE                                                                           |
| Demo Video Link             | NOT APPLICABLE                                                                                                           |

#### Step 4: Run Instructions

Provide clear, step-by-step instructions for the evaluator to run your project locally:

**Pre-requisites:**

[List required software, versions, and system requirements]

Step 1: [e.g., Clone the repository: `git clone <url>`]

Step 2: [e.g., Install dependencies: `pip install -r requirements.txt`] Step

3: [e.g., Configure environment: copy `.env.example` to `.env`] Step 4:

[e.g., Run database migrations: `python manage.py migrate`] Step 5:

[e.g., Start the application: `python manage.py runserver`] Step 6:

[e.g., Open browser at `http://localhost:8000`]

#### Step 5: Known Issues / Limitations

| S.No | Known Issue / Limitation                                                    | Workaround / Status                           |
|------|-----------------------------------------------------------------------------|-----------------------------------------------|
| 1    | Email notification are not integrated                                       | Planned for future                            |
| 2    | Credit score verification uses sample data instead of a live credit         | Demo data is used for testing purpose         |
| 3    | The application is designed for local deployment only and not hosted online | Can be deployed to a cloud platform in future |
