

Customer Journey Map

Date	26 March 2026
Project Name	Credit Card Approval Prediction

Customer Journey Map

The **Customer Journey Map** illustrates the step-by-step interaction between the credit card applicant and the **Credit Card Approval Prediction System** throughout the credit card eligibility and approval process. It highlights the applicant's actions, system touchpoints, thoughts, emotions, process ownership, and opportunities for improvement at each stage. By automating applicant evaluation using machine learning, the system provides faster, more accurate, and transparent credit card approval predictions, improving the overall user experience while reducing manual effort for banks.

Phase of Journey	Stage 1	Stage 2	Stage 3
Actions	Applicant enters personal, financial, employment, and credit details.	System validates inputs and processes the data using the trained Machine Learning model.	User receives credit card approval prediction, and bank officials review the result.
Touchpoint	Web Application (Input Form)	Prediction Engine (ML Model + Backend)	Prediction Result Dashboard
Customer Thought	"Will I be eligible for a credit card?"	"I hope the system analyzes my details correctly and predicts accurately."	"I received my prediction quickly and clearly."
Customer Feeling	Curious / Hopeful	Hopeful / Anxious	Satisfied / Relieved
Process Ownership	Applicant	Credit Card Approval Prediction System	Bank Officer
Opportunities	Improve UI and input guidance; offer real-time validation.	Increase model accuracy and reduce processing time.	Provide clear reasons for prediction and suitable card recommendations.
