

### Brainstorming and Idea. prioritization

|                      |                                        |
|----------------------|----------------------------------------|
| <b>Date</b>          | 26 March 2026                          |
| <b>Project Name</b>  | <b>Credit Card Approval Prediction</b> |
| <b>Maximum Marks</b> | 3 Marks                                |

#### Step 1: Brainstorming and Idea Listing

Each Team Member Lists Out as Many Ideas as possible without judging them at this stage

| S.No | Team Member | Idea                                       | Category         | Group No |
|------|-------------|--------------------------------------------|------------------|----------|
| 1    | Praneeth    | Data preprocessing and feature engineering | Data Analysis    |          |
| 2    | Ritvik      | Train and compare ML models                | Machine Learning |          |
| 3    | Bhavana     | Flask app and IBM Watson deployment        | Web Application  |          |

#### Step 2: Idea. Prioritization

Rate each grouped idea on feasibility and importance than select the final idea(s) to move forward with

| Group No. | Final Idea                               | Feasibility | Importance | Priority | Selected (Yes/No) |
|-----------|------------------------------------------|-------------|------------|----------|-------------------|
| 1         | Credit Card Approval Prediction System   | High        | High       | 1        | Yes               |
| 2         | Credit Card Applicant Analysis Dashboard | Medium      | Medium     | 2        | No                |
| 3         | Credit Risk Assessment System            | Medium      | Medium     | 3        | NO                |
